

NLVM - Natural Language Virtual Machine

Vision

Code is dead. Language lives.

NLVM lets anyone program using plain English.

Problem

Programming is blocked by syntax. Most people never cross that barrier.

Solution

A virtual machine that understands and executes natural language.

Demo

Set x to 5

Add x and 10 and store result in total

Print total

Why Now

AI, NLP, and compiler tech finally make this possible.

People are ready to speak to machines.

Business Model

Free for education

Paid creator tools

Enterprise SDK licensing

Competition

GitHub Copilot: needs syntax

NLVM: works for everyone, even kids

Roadmap

Runtime
